Foreword VIII
List of participants X
Opening address by J. Salánki XIII
Welcome address by G. Fekete XV

Long-term changes
Trophic status and the pelagic system in Lago Maggiore
by R. de Bernardi, G. Giussani, M. Manca and D. Ruggiu 1
The spring development of phytoplankton in Lake Erken: species composition, biomass, primary production and nutrient conditions – a review
by K. Pettersson 9
Some characteristics of the community of autotrophs of Lake Sevan in connection with its eutrophication
by A. S. Parparov 15
Aspects of the ecology of a filamentous alga in a eutrophicated lake
by T. Ozimek 23
The relation of biotic and abiotic interactions to eutrophication in Tjeukemeer, The Netherlands
by E. H. R. R. Lammens 29
Zooplankton community changes in Lake Kinneret (Israel) during 1969–1985
by M. Gophen, S. Serruya and P. Spataru 39
The contribution of silver carp (*Hypophthalmichthys molitrix*) to the biological control of Netofa reservoirs
by H. Leventer and B. Teltsch 47
Changes in the fish and zooplankton communities of Ringsjön, a Swedish lake undergoing man-made eutrophication
by E. Bergstrand 57
The dynamics of a population of roach (*Rutilus rutilus* (L.)) in a shallow lake: is there a 2-year cycle in recruitment?
by M. R. Perrow, G. Peirson and C. R. Townsend 67

Annual and seasonal cycles
Phosphorus eutrophication research in the lake district of south western Friesland, The Netherlands. Preliminary results of abiotic studies
by H. J. W. J. van Huet 75
Phosphorus dynamics following restoration measures in the Loosdrecht Lakes (The Netherlands)
by L. van Liere, R. D. Gulati, F. G. Wortelboer and E. H. R. R. Lammens 87
Seasonal variability of N : P ratios in eutrophic lakes
by J. Barica 97
Trophic response to phosphorus in acidic and non-acidic lakes in Nova Scotia, Canada
by J. J. Kerekes, A. C. Blouin and S. T. Beauchamp 105

Trophic interactions among heterotrophic microplankton, nanoplankton, and bacteria in Lake Constance
by T. Weisse 111
Influence on phytoplankton biomass in lakes of different trophy by phosphorus in lake water and its regeneration by zooplankton
by J. Ejsmont-Karabin and I. Spodniewska 123
Algal growth and loss rates in Lake Loosdrecht: first evaluation of the roles of light and wind on a basis of steady state kinetics
by H. J. Gons and M. Rijkeboer 129
Interactions between sediment and water in a shallow and hypertrophic lake: a study on phytoplankton collapses in Lake Søbygård, Denmark
by M. Søndergaard, E. Jeppesen, P. Kristensen and O. Sortkjær 139
Interactions between phytoplankton, zooplankton and fish in a shallow, hypertrophic lake: a study on phytoplankton collapses in Lake Søbygård, Denmark
by E. Jeppesen, M. Søndergaard, O. Sortkjær, E. Mortensen and P. Kristensen 149
Phytoplankton and zooplankton (Cladocera, Copepoda) relationship in the eutrophicated River Danube (Danubialia Hungarica, CXI)
by A. Bothár and K. T. Kiss 165
Zooplankton structure in the Loosdrecht lakes in relation to trophic status and recent restoration measures
by R. D. Gulati 173
Ecological background and importance of the change of chironomid fauna (Diptera: Chironomidae) in shallow Lake Balaton
by G. Dévai 189
Trophic relationships in the pelagic zone of Mondsee, Austria
by M. Dokulil, A. Herzig and A. Jagsch 199
Trophic relationships between primary producers and fish yields in Lake Balaton
by P. Biró and L. Vörös 213
Predation pressure from above: observations on the activities of piscivorous birds at a shallow eutrophic lake
by I. J. Winfield 223
The distribution of waterfowl in relation to mollusc populations in the man-made Lake Zegrzyńskie
by A. Stańczykowska, P. Zyska, A. Dombrowski, H. Kot and E. Zyska 233

Short-term changes and pilot-scale operations
Light-limited algal growth in Lake Loosdrecht: steady state studies in laboratory scale enclosures
by M. Rijkeboer and H. J. Gons 241
Stir-up effect of wind on a more-or-less stratified shallow lake phytoplankton community, Lake Balaton, Hungary
by J. Padisák, L. G.-Tóth and M. Rajczy 249
Heterotrophic flagellates and ciliates in the hypertrophic Lake Søbygaard, Denmark – seasonal trends and methodological difficulties
by A. Petersen 255
An assessment of the importance of emergent and floating-leaved macrophytes to trophic status in the Loosdrecht lakes (The Netherlands)
by T. J. Malthus, E. P. H. Best and A. G. Dekker 257
The effect of *Daphnia* on filament length of blue-green algae
by P. Dawidowicz 265

Qualitative and quantitative relationships of Amphipoda (Crustacea) living on macrophytes in Lake Balaton (Hungary)
by I. B. Muskó 269
Impact of cyprinids on zooplankton and algae in ten drainable ponds
by M-L. Meijer, E. H. R. R. Lammens, A. J. P. Raat, M. P. Grimm and S. H. Hosper ... 275
Restoration by biomanipulation in a small hypertrophic lake: first-year results
by E. Van Donk, R. D. Gulati and M. P. Grimm 285
Operation of the Kis-Balaton reservoir: evaluation of nutrient removal rates
by F. Szilágyi, L. Somlyódy and L. Koncsos 297
Enclosures study of trophic level interactions in the mesotrophic part of Lake Balaton
by I. Tátrai, L. G.-Tóth, V. Istvánovics and J. Zlinszky 307

Summary of the workshop on perspectives of biomanipulation in inland waters
by M. Gophen 315

Concluding remarks
by H. L. Golterman 319

General Index 321
